I am the 5-th-year Ph.D. student in the college of [Computer Science and Technology](#) at [Zhejiang University](#), fortunately advised by Prof. [Yang Yang](#).

My research focuses are refined to include large-scale time series analysis, the development of foundation model for time series, and an exploration of engaging topics and the latest advancements in technology within this domain.

I have published several papers

[google scholar citations 260000+](#) (You can also use google scholar badge

at the top international AI conferences such NeurIPS.

Currently, Currently, I am exploring the application of LLM in time series analysis to tackle complex industrial problems.

If you are seeking any form of academic cooperation, please feel free to touch me. Meanwhile, **I am actively seeking job opportunities in the industry. If there are any relevant openings, I would greatly appreciate you reaching out. Thank you!**

📰 News

- 2024.09: 📄 Our manuscript titled “PowerPM and DMNet” has been successfully accepted for publication at NeurIPS 2024.

📄 Publications

NeurIPS 2024

DMNet: Self-comparison Driven Model for Subject-independent Seizure Detection \\\ Shihao Tu, [Linfeng Cao](https://caolinfeng.github.io/homepage/), [Daoze Zhang](https://daozezhang.github.io/), **Junru Chen**, Lvbin Ma, Yin Zhang, [Yang Yang](http://yangy.org/) \\\ Difference Matrix-based Neural Network (DMNet) addresses the domain shift in iEEG signals across different subjects by leveraging a self-comparison mechanism for subject-independent automatic seizure detection.

📄 Internships

- 2024.10 - Now, [SUPCON](#), Hangzhou, China.
- 2025.2 - Now, [Zhipu AI](#), Beijing, China.
